20. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

From the elevation of object it was hard to determine flight pattern. It seemed to move as I looked at it, yet it remained nearly in the same position. My friend was there and he saw the same thing but gave it no consideration whatsoever. I asked him ~~where~~ its 'wing etc.'

21. IF POSSIBLE, try to guess or estimate what the real size of the object was in its longest dimension.

22. How large did the object or objects appear as compared with one of the following objects held in the hand and at about arm's length?

23. How did the object or objects disappear from view? I saw it with [redacted] and I [redacted] it once. There - the third time it had disappeared and I had lost it. [redacted] never looked for it. It's departure I missed.

24. In order that you can give as clear a picture as possible of what you saw, we would like for you to imagine that you could construct the object that you saw. Of what type material would you make it? How large would it be, and what shape would it have? Describe in your own words a common object or objects which when placed up in the sky would give the same appearance as the object which you saw.

I don't guess #24. It was metallic. It could be seen easily because of its contour, its substance seemed solid. Beyond a doubt. It was no balloon. Even [redacted] said it was a plane. I said: no "streams" no "sound" no wings - but [redacted] didn't care what it was. Though it puzzled [redacted]. This I am sure. The second time he looked at it twice. There was no machine that resembled it in behavior for there was no sound visible demonstration of sound.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- ☒ c. Outdoors
- d. In an airplane
- e. At sea

- f. Flying over open country?
- g. Other in a public Park
Prospect Park, Bldg

27. What were you doing at the time you saw the object, and how did you happen to notice it?

We were walking and talking in the Park. All open spaces. There was
beautiful scenery. I looked up, and always do, and the object's
presence was made known to me, I observed it for several, etc.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

28.2 How fast were you moving? _____ miles per hour.

28.3 Did you stop at any time while you were looking at the object?
(Circle One) ☒ Yes ☐ No

29. What direction were you looking when you first saw the object? (Circle One)

- | | | | |

31. If you are familiar with bearing terms (angular direction), try to estimate the number of degrees the object was from true North and also the number of degrees it was upward from the horizon (elevation).

31.1 When it first appeared:

- a. From true North 72-80 degrees.
- b. From horizon _____ degrees.

31.2 When it disappeared:

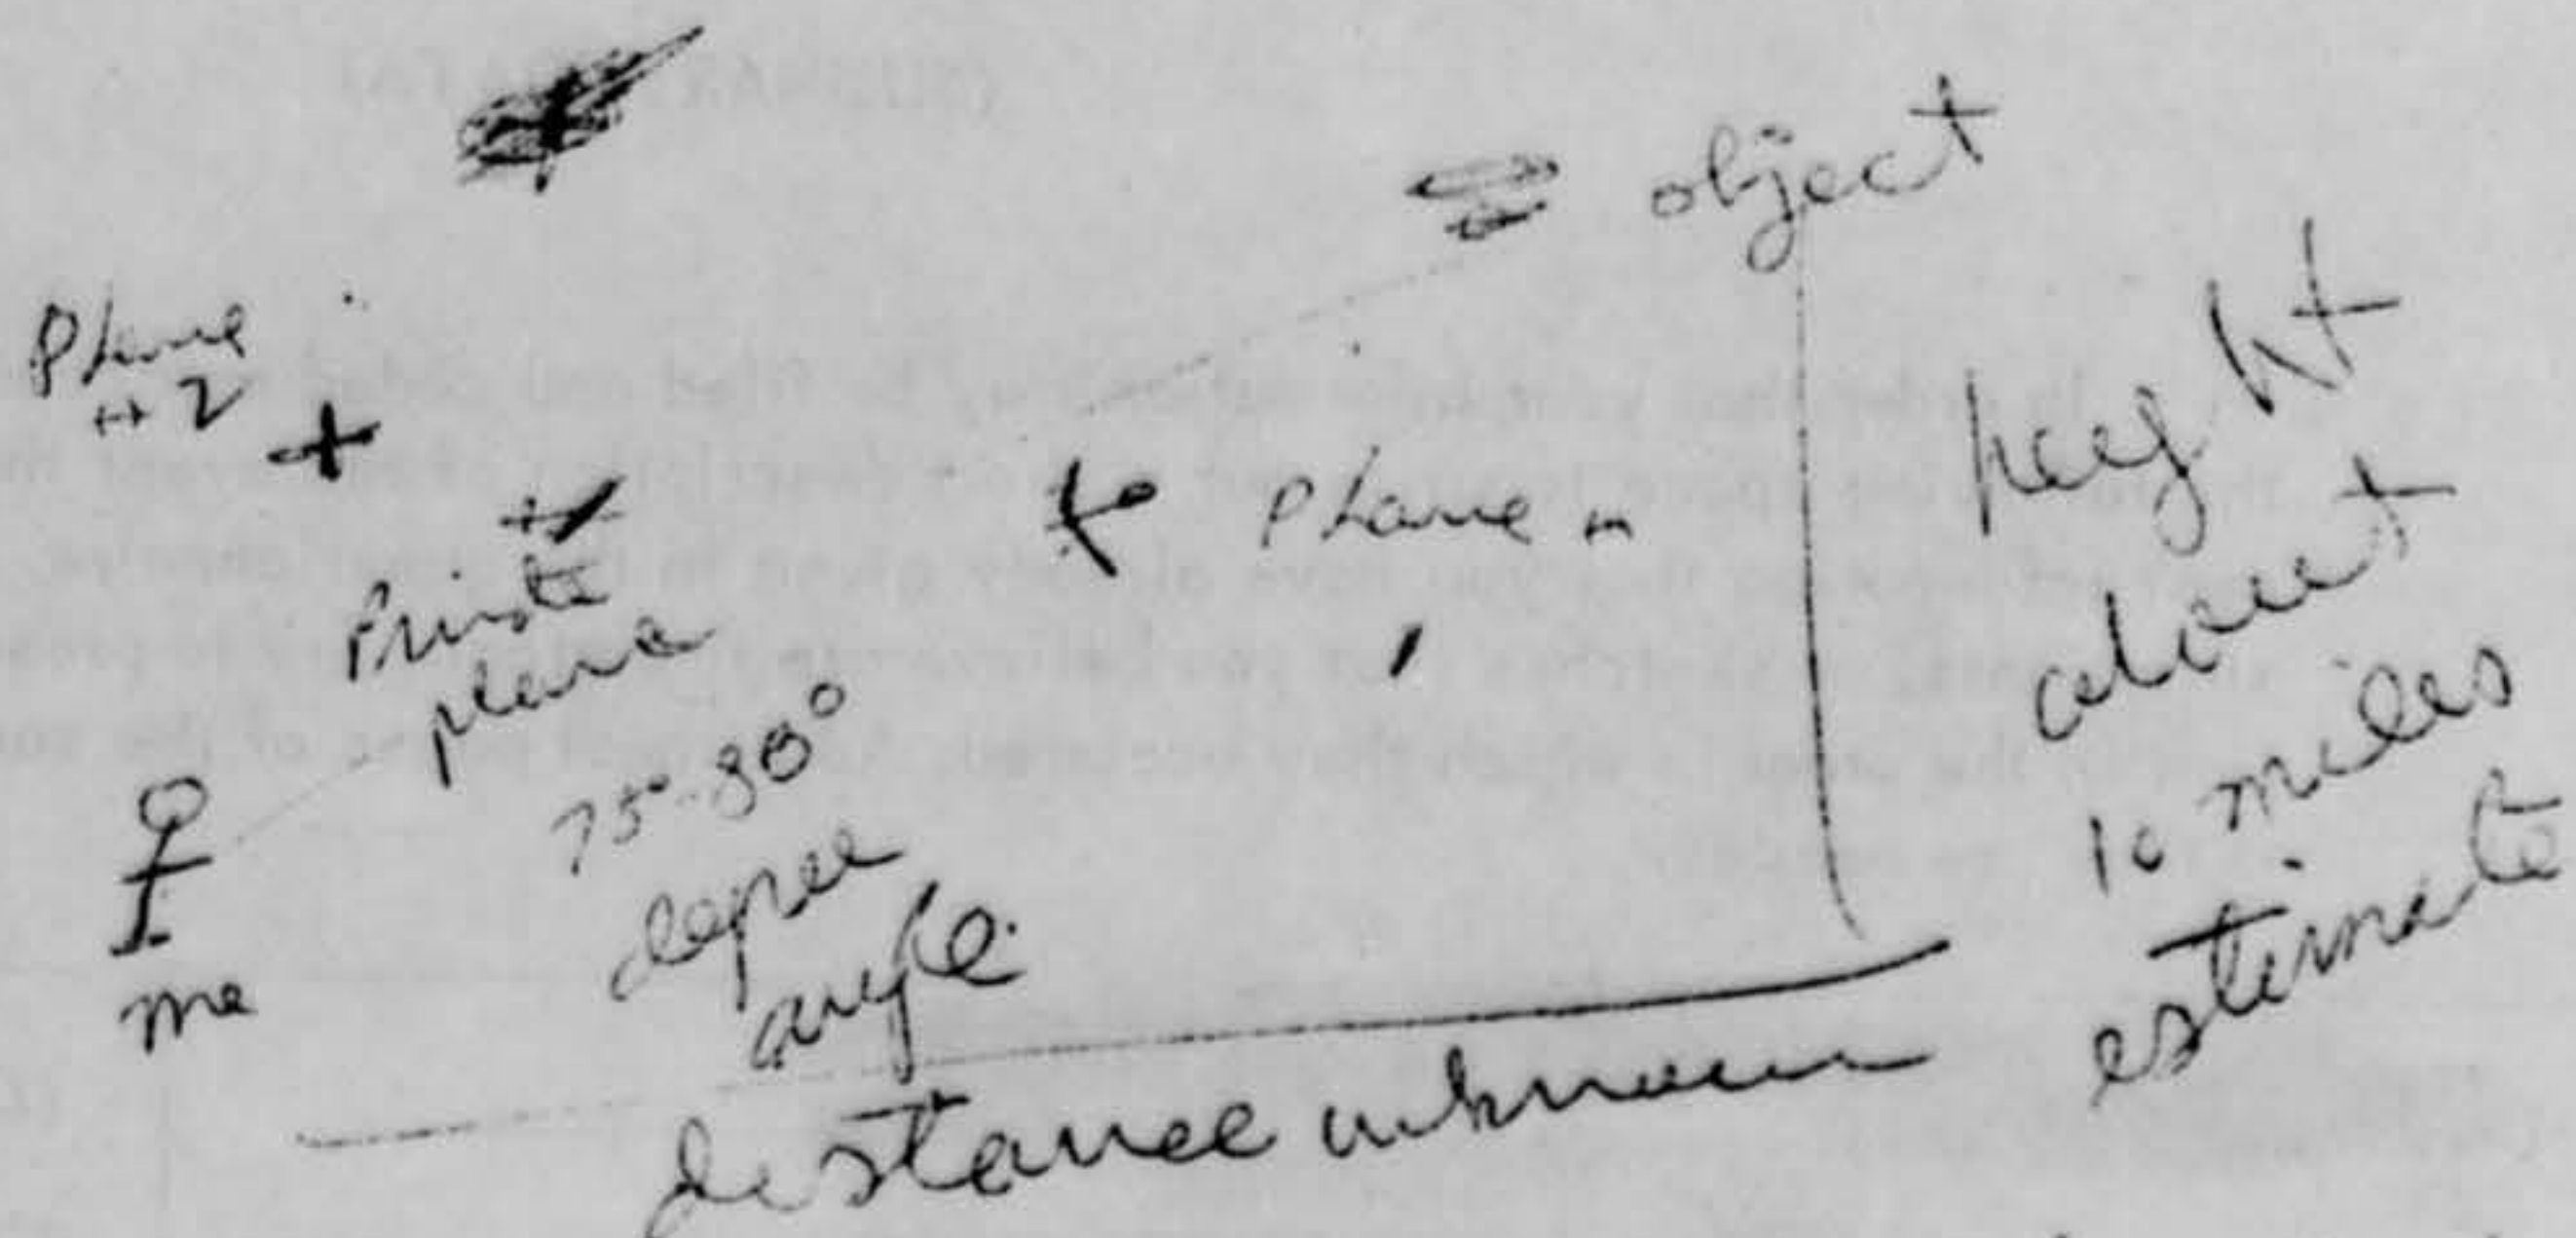

- a. From true North _____ degrees.
- b. From horizon _____ degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

the two planes were commercial type and the private plane began to climb I noticed. Then I moved a little and at the third time I looked for it some 30 feet from me and at the third time I looked for it I had lost it. The private plane was colored I remember the body may have been rusty red in its nose. But I only glanced at these planes, wondering if they saw the object as I had. That's about it.

P.S.

I only speak for myself and what I said and understood.

We were walking in Prospect Park conversing. I said the object in a clear blue sky. The temperature was perfect for a walk that day. We walked like this for some time. I saw this object and stopped to look at it again. I put my hands up to my eyes and remarked I wished I had binoculars. I felt [REDACTED] that [REDACTED] took a quick look and continued to walk.

I noticed no movement. I heard no sounds yet it possibly moved. I said it was high. [REDACTED] I let 10 miles up. I looked at it again and quickly says it's a plane. I looked at it again. I said nothing. I heard no sound. I saw no vapor trail. I told [REDACTED] this I belonged to my time to go and I know what to look for. Besides I had experience on the naval service on identification. I couldn't force [REDACTED] to look but I looked and observed it. I started to walk to the right following behind [REDACTED]. I turned to look at it again but I had lost it. It was gone! I said it was gone, I wonder what it was.

We both saw it was solid. We both saw it was silvery. I said it was metallic. Of what substance I cannot say. I know there was no balloon. I'm not sure if it influenced [REDACTED]. I have known him for 25 years now. Since I was 16. I know his personality as he should know mine.

Three planes were in the sky at the same moment as the object. I looked at them with my eyes. The private plane began to climb. Now we were strictly underneath it.

Dear Sir;

On Saturday, Jan 24, 1959, I was walking in Prospect Park, near the Music Grove, with a old friend [REDACTED]. The time was 1215 and the sky was perfectly clear. Two or three planes were flying around. Two commercial and one private, which I noticed later. As was my custom I looked up expecting nothing.

At a great height I noticed a silver object, metallic, and moving very slowly, leaving no jet traces or streamers. But it was hard to tell which way it was moving. Two of the planes passed underneath it at the time. I looked at my watch it was 1220. Then I called [REDACTED] to look at it. He took a quick glance, less than a second, and said it was a plane.

I looked again and asked where are it's wings. He looked and walked away. I followed suit but I looked again and said I didn't hear anything. Then I ~~XXX~~ saw the private plane climbing. I looked at it and it seemed to be the same silvery object. It was no plane. It had no wings. It was very high. I would judge 10 miles but this is a guess. I cupped my hands over my eyes to see better. Again I asked [REDACTED]. He said it was a plane. But he didn't care to stretch his neck as I did. But he saw it. Even for a brief second. I had it in view for over forty seconds, each time I looked at it. As he walked away I followed. But for the third time I looked up and saw not a sign of it. Nor did I hear anything. I have heard jets at tremendous heights. I have seen their traces or streams way up: and I heard their engines or power from where I was, as they went by. But this UFO or possible, didn't show me any evidence of being a plane. What was it? It couldn't have been a balloon. Its size was too great. And its habits didn't resemble a free flight object. If any confirmation on this sighting allow me the privilege of knowing what I saw. Dont tell me it was an illusion or trick of nature. My friend saw it though he paid no attention to it. This is his nature not mine. I am more thorough in my application to things around me, above me, below me.

Kindly let me know. Are UFO's still about?

Sincerely
/s/ [REDACTED] 3/c R

Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

no wings! no "exhaust" trail, no vapor trail. It's shape was oval or roundish. I am no artist - But did try =  I saw it from its bottom! So did . The movement as I recall was puzzling. I couldn't satisfactorily get its proper direction. There were three planes in the air at the same time - Approximately - (in my view)

18. The edges of the object were:

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.
